## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 101***

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1-11 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The language of the claim raises a question as to whether the claim is directed merely to an abstract idea that is not tied to a technological art, environment, or machine which would result in a practical application producing a concrete, useful, and tangible result to form the basis of statutory subject matter under 35 U.S.C. 101.

The claims are directed to a method that does not require computer-implementation or use of technology to accomplish. The claims allow for the involvement of subjective human decision and therefore do not necessarily produce repeatable, concrete results. How is the NC data generated?

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1, 12, and 17, it is not clear what is meant by the limitation "supposed cutting load distribution". The specification provides no explanation of the meaning of the term "supposed". The dictionary definition of the term "supposed" would render the claim indefinite. This limitation should be changed to "simulated cutting load distribution", in accordance with the specification.

Claims 2-11, 13-16, and 18-21 depend from claims 1, 12, and 17; and incorporate the same deficiencies.

#### ***Allowable Subject Matter***

5. Claims 1-21 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, and 35 U.S.C. 101 set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach or fairly suggest a first generator to generate NC data to machine a first portion of an object, said first portion specified based on a simulated cutting load distribution of said object; and a second generator to generate NC data to machine said object after said first portion of said object was machined, in combination with the remaining features and elements of the claimed invention.
